

You have COVI-19

Sharon

On Tuesday 1st December in the evening I started to have flu like symptoms and woke with them worse the next morning , I spoke to my boss at work and went for a Covid test. By 4pm I had the result, I was positive for Covid-19,

I had a really bad headache and I couldn't keep warm, I kept shivering and spent the rest of the day in bed, but first I sent a text to Helen Templey to ask for prayer. My main concern was for my Mum who I had visited on the previous Saturday. She is 85 and has COPD. So I asked Helen firstly to pray protection over her and John my husband and Abby my daughter, and also to pray for my quick recovery.

Later the same day I received an email circular from Chris Lemming asking everyone from church to pray for my family and myself. I was extremely grateful for all these prayers **and I give testimony to God's greatness**. All of my family (including my Mum) stayed completely clear of Covid and having slept for about 3 1/2 days I started to recover very quickly after 8 days from the start of symptoms.

I was soon back working and I have made a full recovery and have no lingering symptoms, all the glory goes to God's goodness, I praise him and thank him daily for keeping us all safe, I also am very thankful for the pray and support from my church family who are very precious to me.

Sharon
